professional goal

Working in an educational and varied international environment while getting in touch with process chemistry. Using my knowledge and motivation to make a noticeable difference inside the organisation. Utilize feeling for time management and organisation to further develop soft skills to grow in the company.

profile

- master chemical engineering technology: sustainable process and materials engineering
- expected graduation date: June 2018
- large interest in process chemistry with contribution to a sustainable development
- thesis student at Imec: handling surface modification of semiconductor materials
- eager to learn: internship at Qpinch in which a short cut tool was created in excel, to do a rough cost estimation of an actual project
